EDUCATION

Texas A&M University

Bachelor of Science in Computer Science | GPA: 3.88

Minor in Mathematics and Business

College of Engineering (Honors)

College Station, TX

August 2022 – May 2025

Relevant Coursework: Data Structures & Algorithms, Program Design and Concepts (C++), Engineering Lab 1 (Python), Programming 1 (Java)

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, HTML/CSS, C#, C++

Technologies: React, Node.js, .NET, MongoDB, Git, Postman

EXPERIENCE

Software Engineering Intern

Esync Technologies

August 2023 – Present

Remote

- Developed a mobile application using **Flutter** and **Dart** and deployed it for consumer use
- Collaborated with team to create predictive machine learning model to detect cyber risks and data breaches using **Python**
- Deployed pre-trained models on **Keras** and **Tensorflow** with a focus on utilizing Hugging Face as a platform

Software Engineering Intern

Chevron

May 2023 – August 2023

Houston, TX

- Developed a full-stack web application in **C#** and **XAML** using the **.NET** framework that automates a process for 2,500+ office and field users to edit 500+ software libraries and data tables
- Enhanced user productivity on well processes by cutting the time to edit software libraries from 1-2 days to a few minutes
- Collaborated with a team of software engineers to develop a **CI/CD** pipeline and participated in **Agile**/Scrum ceremonies

Artificial Intelligence College Pathways at Texas A&M

AI4ALL

February 2023 – May 2023

College Station, TX

- Collaborated with peers on a program to show AI's impact on personalization using a supervised learning algorithm by utilizing **Python** tools such as **Pandas**, **Sklearn**, and **NumPy**
- Learned the applications and fundamental technical concepts of machine learning and neural networks

PROJECTS

Productify | *React, Node.js* | <https://devpost.com/software/productify-rhgv07>

- Developed a productivity dashboard in **React** that allows users to tailor their workspace with widgets designed to enhance efficiency such as a to-do list, a news widget, and a weather widget that update in real-time using **APIs**
- Worked with a team of students at Rice University as part of HackRice 13.

Budget Guard | *JavaScript, Vue.js* | <https://github.com/salembsaleh/Budget-Guard>

- Developed an application for students on a budget to find the cheapest groceries, food, drinks, and gas in a radius.
- Worked with a team of students at Texas A&M University as part of Aggie Coding Club.

AWARDS

- Craig and Galen Brown Engineering Honors Student at Texas A&M University (Top 10% of Engineering Students)
- Dean's Honor Roll Award Fall 2022 and Spring 2023 (Awarded for having above 15 credits and a 3.75 GPA)
- JPMorgan Chase & Co. Software Engineering Virtual Experience Program on Forage – June 2023
